

AMARILLO

Yellow glue for adhesive sticky surfaces preparation,
for mass catching flies and insects

- ✓ rain and irrigation resistance.
- ✓ Not toxic – water based.
- ✓ Adhesiveness is renewed by applying new layer over the previous one.
- ✓ Recommended for use in barns, cow sheds, dairy farms and more.

Application instructions:

- Apply Amarillo by spraying or brushing over plastics sheets or plastic made of containers.
- The layer must be thick enough to allow proper mass trapping of flying pests.
- The product is ready to use – do not add water.
- Immediately after applying Amarillo, wash your hands and applications tools with soap and water.
